300 Watt Roller Inductor Tuner (160m - 6m)

\$235

MFJ-969

The MFJ-969 has an AirCore™ roller inductor and continuous 160 - 6m coverage. The three digit turn counter and spinner knob give you exact inductance control. You get ultra high-Q, the lowest loss, highest efficiency of any roller inductor in ham radio. A large self-cleaning wiping contact gives you excellent low-resistance connection without contact arcing or burning. A solid 1/4 inch brass shaft with self-align bearings gives smooth non-binding operation.

AL-811HX Gives 800 Watts PEP output!

\$979

The AL-811HX amplifiers are used more than any others in the world. AL-811HX has a worldwide reputation for legendary quality, flawless performance, proven reliability and superb customer service. All band, all mode coverage 160-10 Meters, extra heavy duty power supply, tuned input circuit providing a 50 Ohm load for your rig, optimum Q output tank, quiet pressurized ventilation, two illuminated meters, exclusive Adapt-A-Volt power transformer.

AL-80BX Doubles Average SSB power, 1KW PEP SSB

Ameritron's AL-80BX KW output desktop HF linear can double your average SSB power output with high-level RF processing using Ameritron's exclusive Dynamic ALC™. Features RF Bias™ heat eliminator, heavy duty power supply genuine Amperex™ 3-500Z tubes, 70% efficiency over nearly the entire operating range.

AL-572X Near Legal Limit™ Amplifier

Ameritron AL-572X has 1300 Watt PEP SSB and 1000 Watt CW output, 160-10 Meters, 4 rugged Svetlana 572B tubes. Near Legal Limit power and 3-seconds warm-up. Built in multi-voltage AC supply, dynamic ALC, tuned 50 Ohm input, QSK compatible, fan cooled vernier reduction drives on plate & load.

ALS-500MX 500 Watt Mobile Amplifier

Ameritron ALS-572MX no tune solid state amplifier has 500w output, 160-10 Meters. Requires 13.8 VDC and 75 amps. Small size 3.5 x 9 x 15" fits easily into most automobiles. Instand band switching, no tuning and no warm up required. Uses 4 rugged 2SC2879 high power linear RF transistors. SWR and ALC fault protection disables and bypasses the amplifier if antenna SWR is excessive.

The ultimate HF modem! Fast, full featured and upgradable to PACTOR-III. Send email, transfer files, establish real-time data links. The PTC-IIpro modem is the multi mode data interface between your PC and radio equipment. The PACTOR-II mode is the industry standard, and the most robust digital mode available for radio data connections. The PTC-IIpro will maintain links in conditions with signal to noise ratios of minus 18 dB, transferring data with absolutely inaudible signals. The PTC-IIpro comes standard with 2 MB of RAM for incoming data storage, integrated RS-232 and TTL interface for control of common radios and a temperature compensated crystal oscillator for stability. The PTC-IIpro incorporates an audio amplifier for output to a speaker or headphones, which allows the PTC-IIpro's powerful DSP to be used with any audio signal. Built-in ability for GPS position reporting. With the optional Packet-Radio modules, the PTC-IIpro will function as a VHF/UHF modem (up to 19200 baud) and act as a bidirectional gateway for data between HF and VHF/UHF radios. Easily installed with compatible radios from Icom, Kenwood, Yaesu, SGC, SEA, Furuno, R&S and others. Use the PTC-IIpro with commercial stations worldwide or the international network of Winlink amateur radio operators that support PACTOR-II and PACTOR-III.
